

25-29 September 2023
FH Awareness Day: September 24

As part of **EAS FH Week 2023**, we are seizing the chance to showcase the events organized by patient groups and clinics within the FH Community. We want to make FH more visible to the general public, medical professionals, and government decision-makers, demonstrating that we need to manage FH together, in close collaboration.

You are welcome to follow us on social media and join us in disseminating FH-related information within your network using the hashtags **#FHWeek**, **#FindFH**, **#FHAware**, and **#FHAware2023**.

About FHSC

FHSC
EAS Familial
Hypercholesterolaemia
Studies Collaboration

The EAS-FHSC is dedicated to enabling the medical and global communities to advocate for changes within their countries or organizations regarding the detection and management of Familial Hypercholesterolaemia (FH). Our goal is to encourage early diagnosis and more efficient treatment of this condition.

To tackle these challenges, **the EAS FH Studies Collaboration (FHSC)** has been gathering, harmonising and analysing data from FH investigators worldwide since 2015.

Increasingly, the number of collaborating centers is growing year by year.

Think globally, act locally. Read about FH-related national activities and recent developments

Within our network, we think globally, act locally. **FHSC supports national coordinating centers** in their efforts to implement tailored treatment strategies aligned with their country's unique requirements, all with the goal of lessening the global burden associated with FH.

It's worth noting that each year, we present updates and new findings from these initiatives.

This year we would like to highlight the activities in Australia, Greece, Iraq, Pakistan, Russia, Singapore, South Africa, Thailand and Vietnam.

FH Webinar series has officially kicked off!

FH Awareness Day Webinar Series

A joint initiative by EAS & FH Europe Foundation

5 webinars running from 25th-29th September 2023

Key topics:

- Genetics
- Screening
- Importance of Measuring Lp(a)
- Access to Treatment
- Challenges for children

Let's Manage FH Together

We are thrilled to announce that **our FH webinar series in cooperation with FH Europe Foundation** has officially kicked off! If you missed the earlier announcements about these exciting events, don't worry – you can still join and benefit from the knowledge our experts are eager to share with you.

Please note that there has never been such an initiative! If you haven't signed up already, please take the opportunity to do so for our upcoming webinars.

Explore additional information about the subjects, presenters, and secure your spot now by completing the registration process:

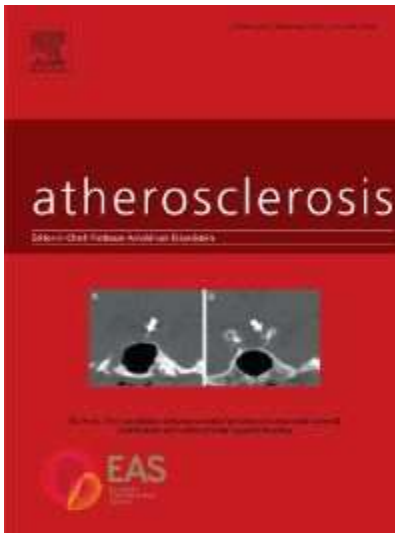

[Screening: experience from cascade screening, universal screening and latest insights on screening on the EU level, September 26](#)

[Importance of Measuring Lp\(a\) in patients with HeFH & HoFH, September 27](#)

[Access to Treatment for HeFH and HoFH, September 28](#)

[Challenges for Children with FH, September 29](#)

Explore FH Webinar Series themes and relevant publications

Delve deeper into the realm of knowledge with a comprehensive collection of publications centered around FH (Familial Hypercholesterolemia) and the subjects spotlighted in **the FH Webinar Series**.

Atherosclerosis Journal proudly offers a handpicked selection of the recent relevant articles in this area, providing you with invaluable insights and resources to further enrich your understanding.

Explore these thought-provoking publications to stay at the forefront of FH research and development.
